Amharic GFF syllables keyboard layout

ጂኤፍኤፍ

Q Shift

Key

The large character is typed by the key alone. Hold **Shift** for the one at top right. The small grey letter is the English key it sits on.

The Ge'ez Frontier Foundation's phonetic method: each consonant key types the bare form (s ስ, l ል, m ም), and the vowel after it gives the syllable (se ሰ, su ሱ, si ሲ, sa ሳ, sie ሴ, so ሶ). Typing s twice gives ሥ. Shift+; types the word space ፡, twice for ፨, and the comma key types ፣.

Best for: Everyone, on any keyboard: no new layout to learn.
