Armenian Phonetic keyboard layout

Հնչյունային

The large character is typed by the key alone. Hold **Shift** for the one at top right. Hold **AltGr** (the right Alt key; Ctrl+Alt also works) for the one at bottom right, and Shift+AltGr for bottom left. The small grey letter is the English key it sits on.

Windows Armenian Phonetic. Letters sit on the English keys that sound like them, ա on A, u on S. The number row holds է on 1, թ on 2, փ on 3, ձ on 4, ջ on 5, և on 7, ը on 8, չ on 9 and ճ on 0. Hold AltGr for digits.

Best for: People who know QWERTY, which is how most Armenians type today.
