Esperanto X-system keyboard layout

X-sistemo

The large character is typed by the key alone. Hold **Shift** for the one at top right. The small grey letter is the English key it sits on.

Type x after a letter to add its mark: cx ĉ, gx ĝ, hx ĥ, jx ĵ, sx ŝ, ux ŭ. Esperanto has no x of its own, so nothing is lost. Works on physical and on-screen keys, not a phone's own keyboard.

Best for: Esperantists who already type in the x-system.
