Farsi Standard keyboard layout

استاندارد

Q Shift
Key

The large character is typed by the key alone. Hold **Shift** for the one at top right. The small grey letter is the English key it sits on.

Persian (Standard), the layout of Iran's national standard ISIRI 9147, built into Windows. پ, چ, ژ and گ have keys of their own, and Shift+B types the half-space.

Best for: Anyone who types Persian on Windows, Mac or Linux and wants the same keys here.
