Kazakh Standard keyboard layout

Стандартты

The large character is typed by the key alone. Hold **Shift** for the one at top right. Hold **AltGr** (the right Alt key; Ctrl+Alt also works) for the one at bottom right, and Shift+AltGr for bottom left. The small grey letter is the English key it sits on.

Windows Kazakh. The nine letters Russian lacks are on the number row: ә on 2, і on 3, ң on 4, ғ on 5, ү on 8, ұ on 9, қ on 0, ө on the minus key and h on the equals key. Digits need Shift.

Best for: Anyone who types Kazakh on Windows and wants the same keys here.
