Khmer NiDA keyboard layout

NiDA

The large character is typed by the key alone. Hold **Shift** for the one at top right. Hold **AltGr** (the right Alt key; Ctrl+Alt also works) for the one at bottom right, and Shift+AltGr for bottom left. The small grey letter is the English key it sits on.

NiDA, the Khmer Unicode standard from Cambodia's national ICT authority. The J key types the coeng ្, which puts the next consonant under the one before it.

Best for: Everyone who types Khmer Unicode.
