Mongolian Standard keyboard layout

Стандарт

Q Shift
Key

The large character is typed by the key alone. Hold **Shift** for the one at top right. The small grey letter is the English key it sits on.

Windows Mongolian, which is not arranged like Russian. а is on G, о on K, ө on F, ү on O, е on the minus key and ₮ on 4. The number row types symbols, so digits need Shift.

Best for: Anyone who types Mongolian on Windows and wants the same keys here.
