Polish Polish (Programmers) keyboard layout

Polska (programisty)

The large character is typed by the key alone. Hold **Shift** for the one at top right. Hold **AltGr** (the right Alt key; Ctrl+Alt also works) for the one at bottom right, and Shift+AltGr for bottom left. The small grey letter is the English key it sits on.

Polish (Programmers), the layout nearly every computer in Poland uses: US QWERTY, with AltGr plus a letter for its Polish form. AltGr+A ą, C ć, E ę, L ł, N ń, O ó, S ś, Z ż, and X for ź, since Z is taken.

Best for: Almost everyone: it works on any English keyboard, and it is what Polish offices and schools use.
