Kurdish (Sorani) Central Kurdish keyboard layout

کوردیی ناوەندی

Q Shift

Key

The large character is typed by the key alone. Hold **Shift** for the one at top right. The small grey letter is the English key it sits on.

Windows Central Kurdish. Most letters sit on English keys that sound alike, and Sorani's own vowels and letters have keys of their own: ە on E, ۆ on O, ێ on Shift+Y, ڕ on Shift+R and ڵ on Shift+L.

Best for: Anyone who types Kurdish on Windows and wants the same keys here.
