Tamil Tamil99 keyboard layout

தமிழ்99

Q Shift

Key

The large character is typed by the key alone. Hold **Shift** for the one at top right. The small grey letter is the English key it sits on.

Tamil99, the Tamil Nadu government standard. Each key shows a letter on its own: after a consonant, a vowel key types the vowel sign instead, so க (H) then ஆ (Q) makes கா. Doubled consonants such as க்க get their pulli automatically.

Best for: Typists who learnt Tamil99, and anyone who wants fewer key presses: most Tamil words take fewer keys here than on InScript.
