# Tigrinya GFF syllables keyboard layout

ጂኤፍኤፍ

Q Shift
Key

The large character is typed by the key alone. Hold **Shift** for the one at top right. The small grey letter is the English key it sits on.

The Ge'ez Frontier Foundation's phonetic method for Tigrinya: each consonant key types the bare form (s ስ, l ል, m ም), and the vowel after it gives the syllable (se ሰ, su ሱ, si ሲ, sa ሳ, so ሶ). Shift+Q is ቕ, so Qe types ቐ. Shift+; types the word space ፡, twice for ።.

Best for: Everyone, on any keyboard: no new layout to learn.
