Turkish Easy accents keyboard layout

Kolay aksanlar

The large character is typed by the key alone. Hold **Shift** for the one at top right. Hold **AltGr** (the right Alt key; Ctrl+Alt also works) for the one at bottom right, and Shift+AltGr for bottom left. The small grey letter is the English key it sits on.

Your English keyboard, with what US-International can reach: AltGr+, for ç, AltGr+P for ö and AltGr+Y for ü. It has no ğ, ı or ş, so tap those in the letter bar, or let smart accents add them.

Best for: Anyone with an English keyboard who writes some Turkish: learners, and families abroad.
