Turkish Turkish F keyboard layout

Türkçe F

The large character is typed by the key alone. Hold **Shift** for the one at top right. Hold **AltGr** (the right Alt key; Ctrl+Alt also works) for the one at bottom right, and Shift+AltGr for bottom left. The small grey letter is the English key it sits on.

Turkish F, the national standard layout, arranged for Turkish: the common letters u i e a ü t k m l y ş sit on the home row, and the top row starts f g ğ ı. Slower to learn than Q if you know English, faster once learned.

Best for: People who learned on F, or who want to learn the layout designed for Turkish.
