Turkish Turkish Q keyboard layout

Türkçe Q

The large character is typed by the key alone. Hold **Shift** for the one at top right. Hold **AltGr** (the right Alt key; Ctrl+Alt also works) for the one at bottom right, and Shift+AltGr for bottom left. The small grey letter is the English key it sits on.

Turkish Q, the keyboard most people in Türkiye use: QWERTY with ğ and ü right of P, ş and i right of L, and ö and ç where English has comma and full stop. The key English keyboards mark I types the dotless ı.

Best for: People who learned to type in Türkiye, or have a Turkish Q keyboard.
