Ukrainian Phonetic keyboard layout

Фонетична

The large character is typed by the key alone. Hold **Shift** for the one at top right. The small grey letter is the English key it sits on.

Letters sit on the English keys that sound like them: и on Y, і on I, я on Q, в on W. є is on the full stop key, ї on the comma key, ґ on the semicolon key, ч on the quote key and ю on the backslash key.

Best for: People who know QWERTY and do not want to learn the Windows layout.
