Uyghur Uyghur keyboard layout

ئۇيغۇرچە

Q Shift

Key

The large character is typed by the key alone. Hold **Shift** for the one at top right. The small grey letter is the English key it sits on.

Windows Uyghur. Every vowel has its own letter and key: ا on F, ە on G, ې on E, ى on H, و on O, ۇ on U, ۆ on Shift+K and ۇ on V. The slash key types ئ, which starts any word beginning with a vowel.

Best for: Anyone who types Uyghur on Windows and wants the same keys here.
