Vietnamese Telex keyboard layout

Telex

The large character is typed by the key alone. Hold **Shift** for the one at top right. The small grey letter is the English key it sits on.

Telex uses letters for marks: aa â, aw ă, ee ê, oo ô, ow ơ, uw ư, dd đ, then s f r x j for the tones. tieengs becomes tiếng, and z clears a tone.

Best for: Most Vietnamese typists: it needs no number row, so it is quickest on phones.
